

CiMON probe

The CiMON probe is a special gastric probe with an integrated measurement function for intra-abdominal pressure (IAP).

The IAP is measured via a small air-filled balloon located at the distal tip of the CiMON probe.

Technical Data

General

Disposable	CiMON probe
Article number	PV9116L120
Material	Polyurethane, transparent, radiopaque, latex-free, DEHP-free
	X-ray mark of balloon: stainless steel
Diameter probe	16 CH / 5.33 mm / 0.21 inch
Overall length of probe	120 cm
Usable length	110 cm
Length of pressure measuring line	115 cm
Distance of length marks	10 cm
Diameter feeding- / decompression lumen	2.07 mm
Balloon filling volume	1.1 ml
Total filling volume feeding tube	12 ml
Equipment Class CE	Ila

Guidewire

Length of guidewire	150 cm
Diameter of guidewire	1.35 mm
Material	Stainless steel

Operating Conditions

Temperature range	10 to 40 °C
Relative humidity	40 to 80 % (non condensing)

Transport And Storage Conditions

Temperature range	10 to 40 °C
Relative humidity	40 to 80 % (non condensing)
Shelf life	1 year
Sterilization procedure	Ethyleneoxid

Technical specifications are subject to change without further notice.
